Introduction

Axiomtek's FSC (Flash SATA CFast) series operates at SATAIII 6.0Gb/s. Compliant with CFast™ 2.0 standard, it is designed with 7+17 pin connector and is SATA compatible. Due to the idle power saving, it reduces 30% power consumption. The FSC is featured as small form factor, and suitable for most industrial application.
The FSC can work under harsh environment, and complies with ATA protocol. Without additional drives, the disk can be configured as a boot device or data storage device. The FSC support hardware write protect to prevent modification of valuable data on a device.
